

# PROJECT OVERVIEW

1

## BUSINESS SCENARIO

Business Case for the project

2

## SOLUTION REQUIREMENTS

Solution needs of the business

3

## ARCHITECTURAL PATTERN

Architectural pattern for an analytics solution

4

## HANDS-ON PROJECT ARCHITECTURE

Architecture for the Hands-On Project

5

## REPOSITORIES

Review of the project repositories

SECTION 1

# BUSINESS SCENARIO

---

# BUSINESS OVERVIEW OF VINO WORLD

01

## HISTORY

Vino World - Italian Wine Retailer

- *3 Online Stores opened 1 year ago on different Websites*
- *Arancione sells wines with a score > 95*
- *Verde sells wines with a score Between 90 and 95*
- *Celeste sells wines with a score Between 85 and 89*

# BUSINESS SCENARIO

*Business challenge for Vino World*

02

## ANALYTICS

- Lack of an Analytics System
- Online sites provide monthly sales data in different formats
- Integrating data and deriving insights takes a lot of time

03

## SALES ANALYSIS

- Which Products sell the most?
- Which stores contribute the most?
- Do Vintage and Score influence sales?

04

## PRODUCT CATEGORY

- Which type of wine, vintage, and score should we focus on?
- Which type of store products should we focus on?
- Which province's wines should we focus on?

SECTION 2

# SOLUTION REQUIREMENTS

# SOLUTION REQUIREMENTS

*What kind of solution Vino World needs?*

05

**NO ON-PREMISE  
INFRASTRUCTURE**

**ANALYTIC  
DASHBOARDS**

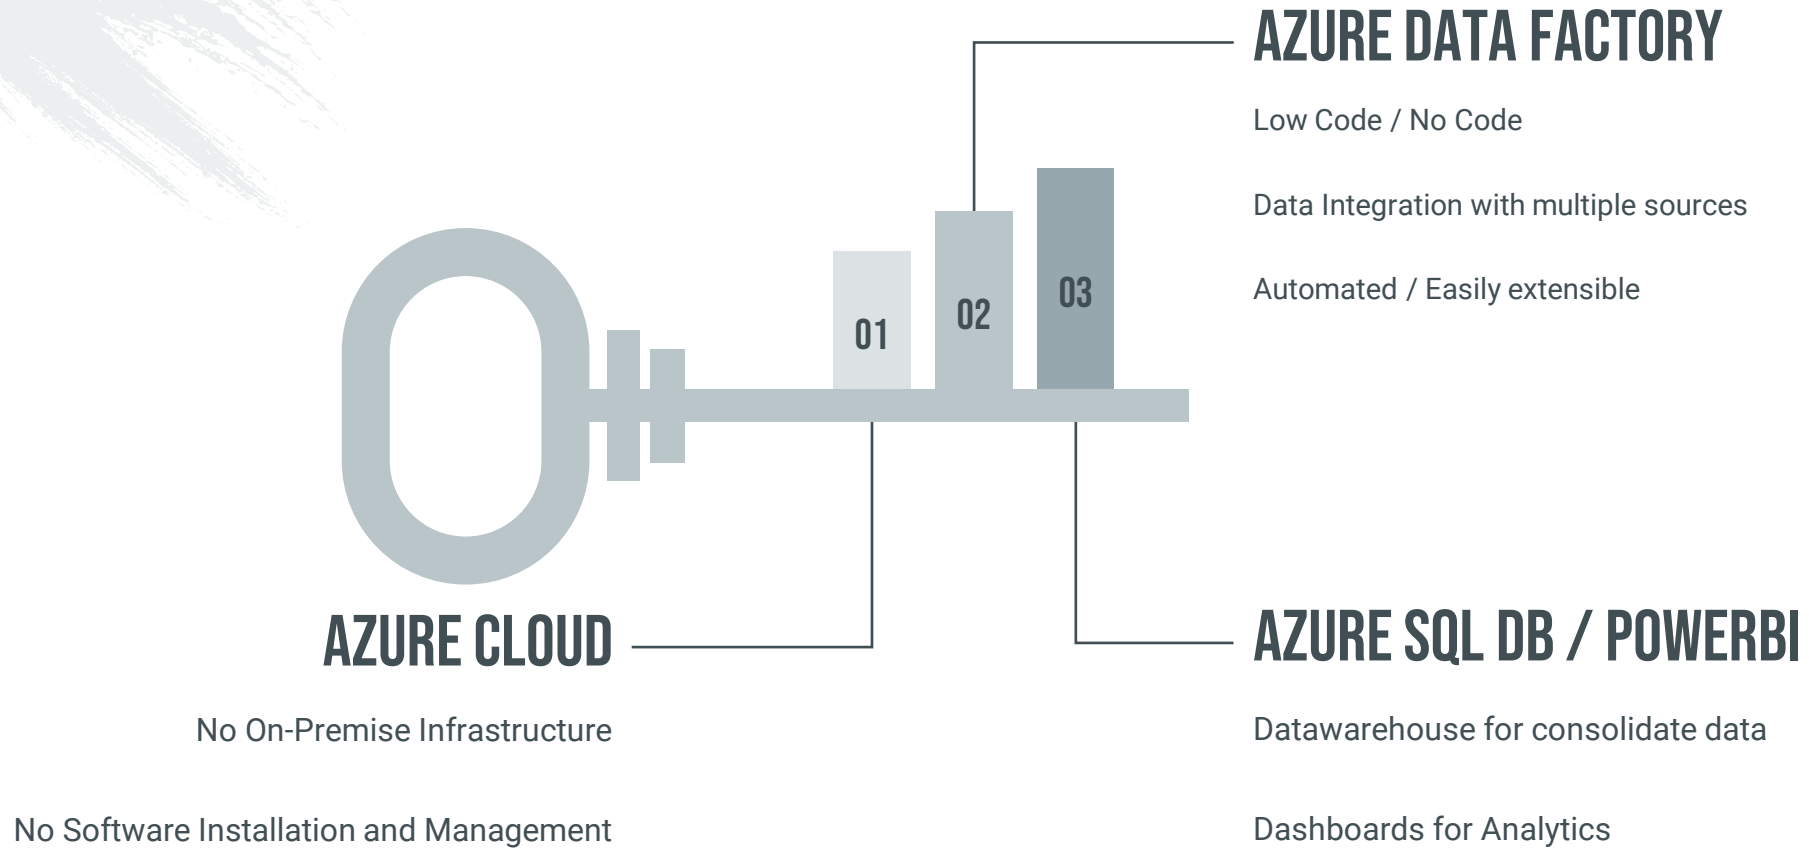

**NO SOFTWARE  
MANAGEMENT**

**LOW CODE / NO  
CODE**

**DATA  
INTEGRATION**

# SOLUTION REQUIREMENTS

*Keys to the solution*

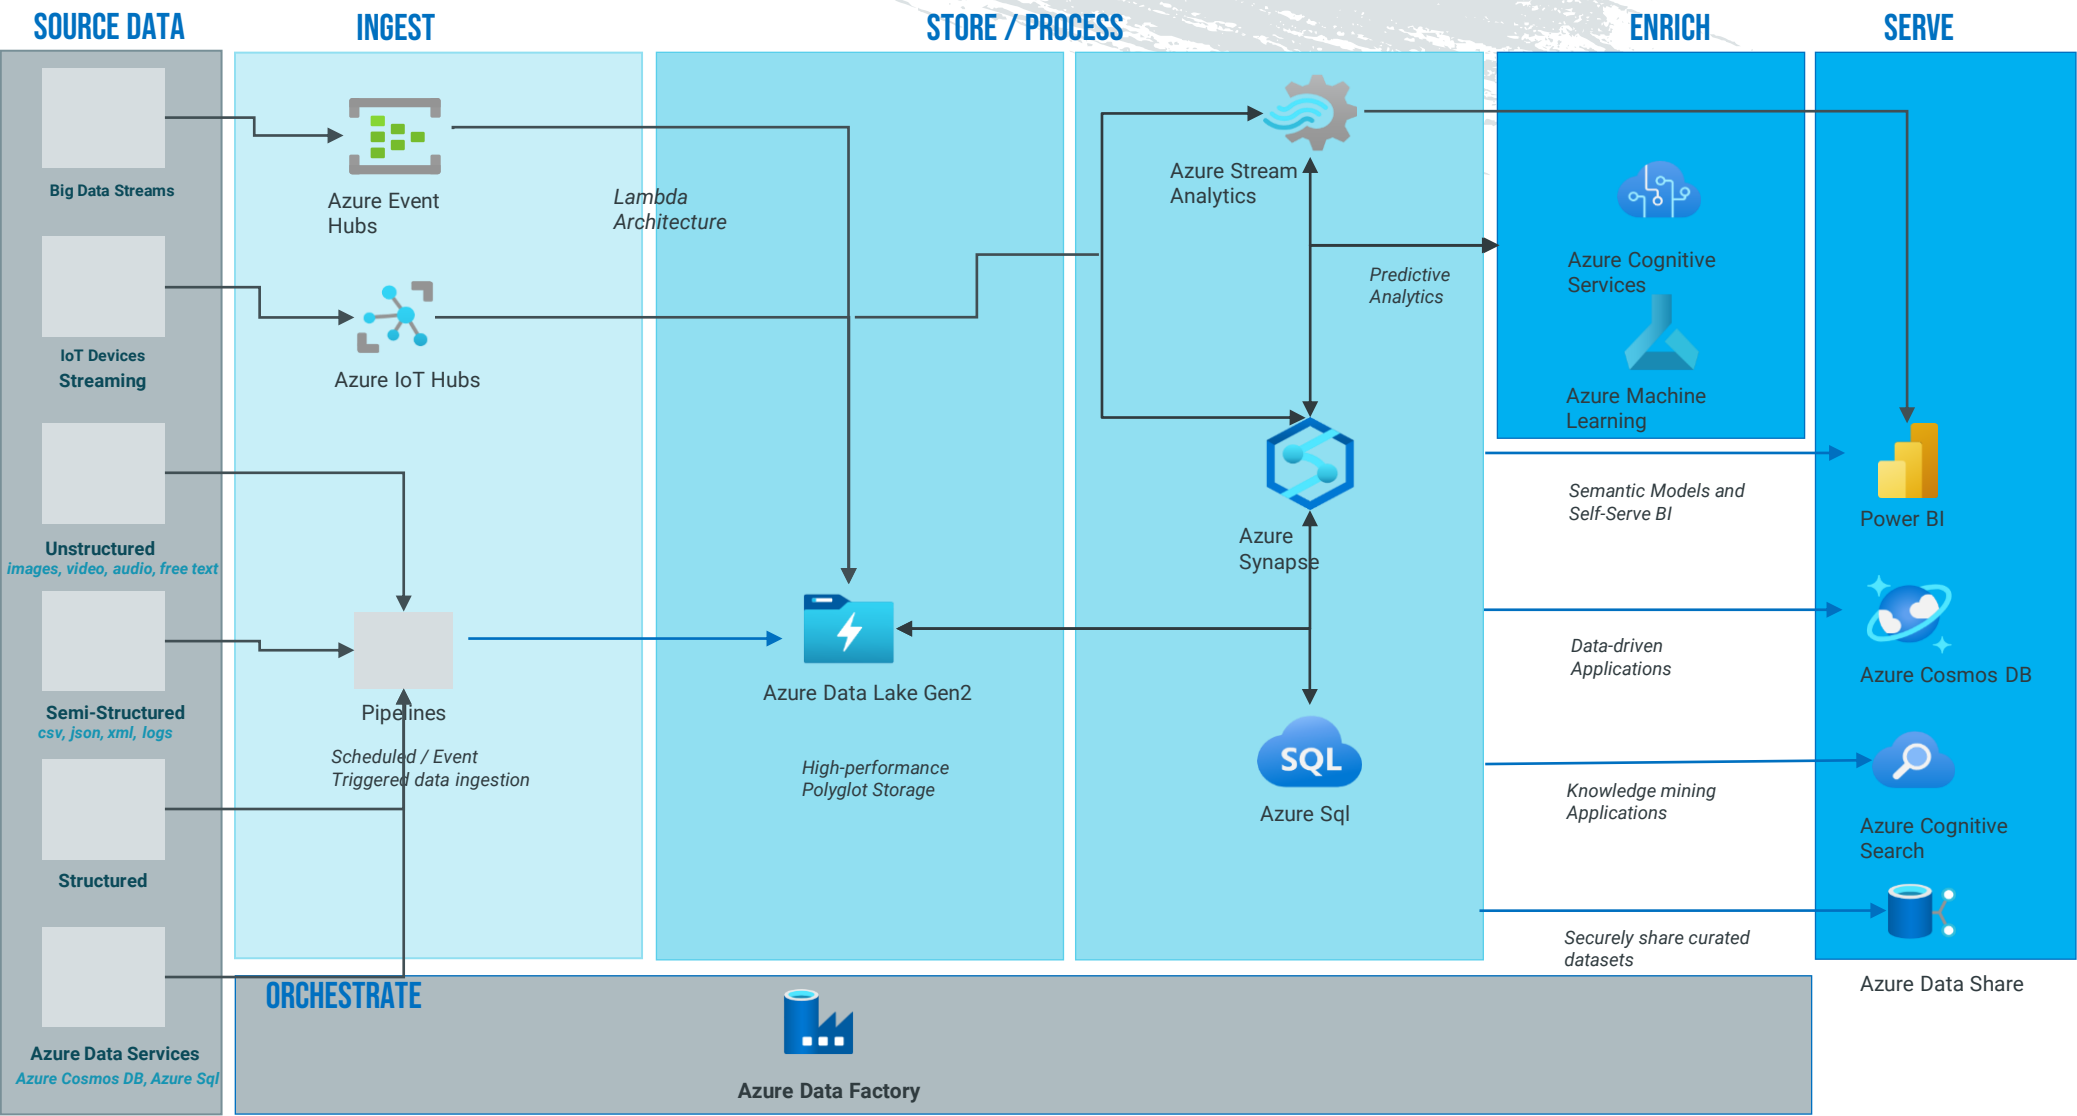

SECTION 3

# ARCHITECTURAL PATTERNS

# ARCHITECTURAL PATTERNS

## Architectural Pattern for an Analytics Solution

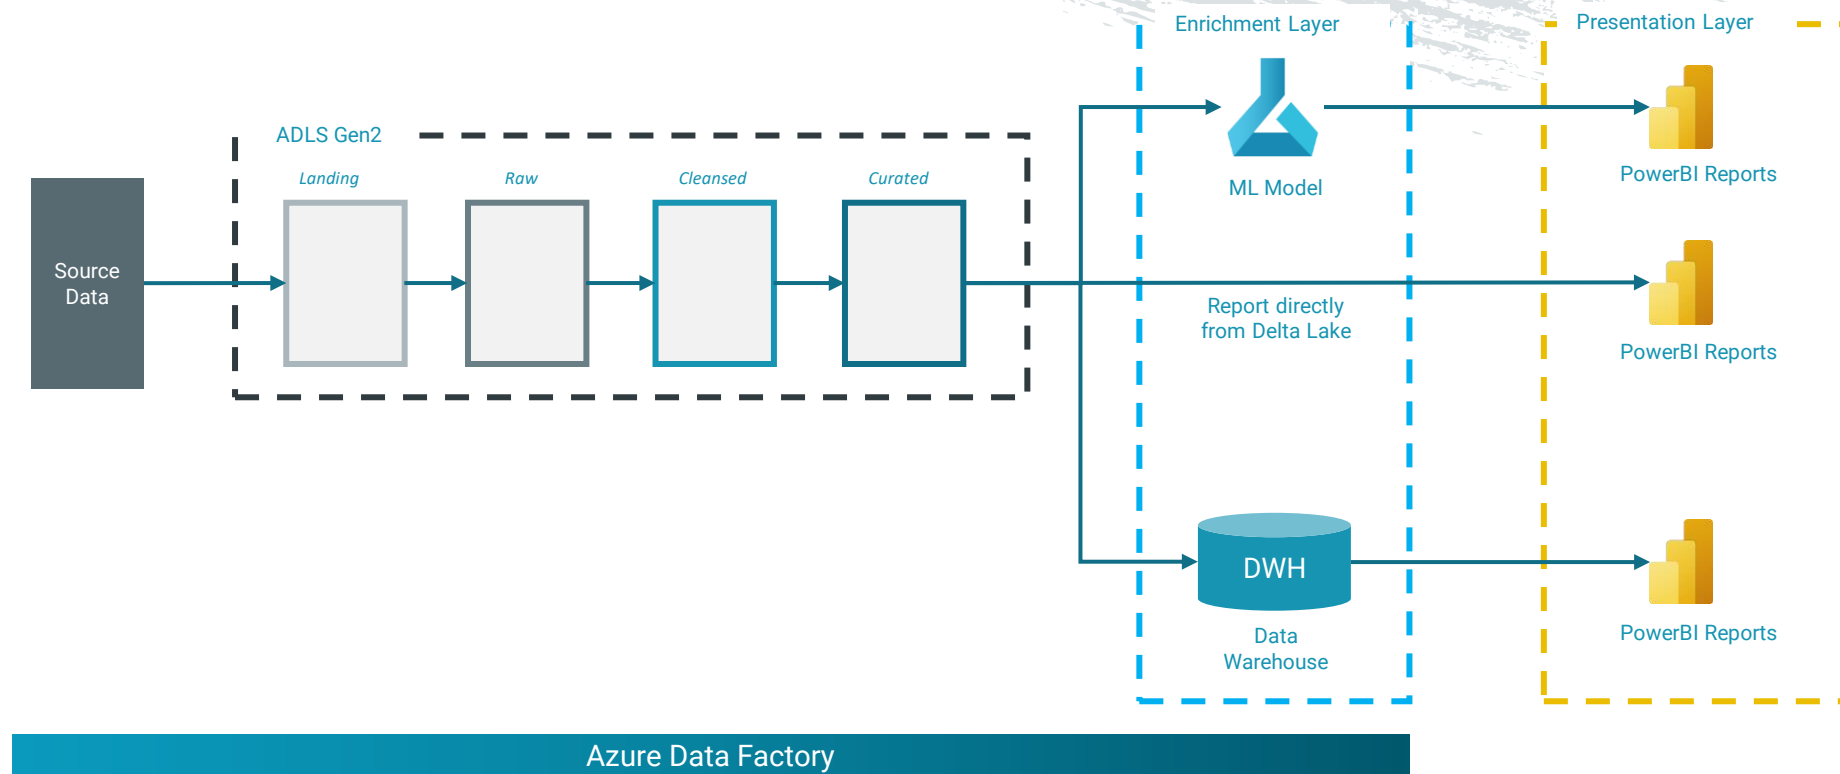

SECTION 4

# HANDS-ON PROJECT ARCHITECTURE

# ARCHITECTURE

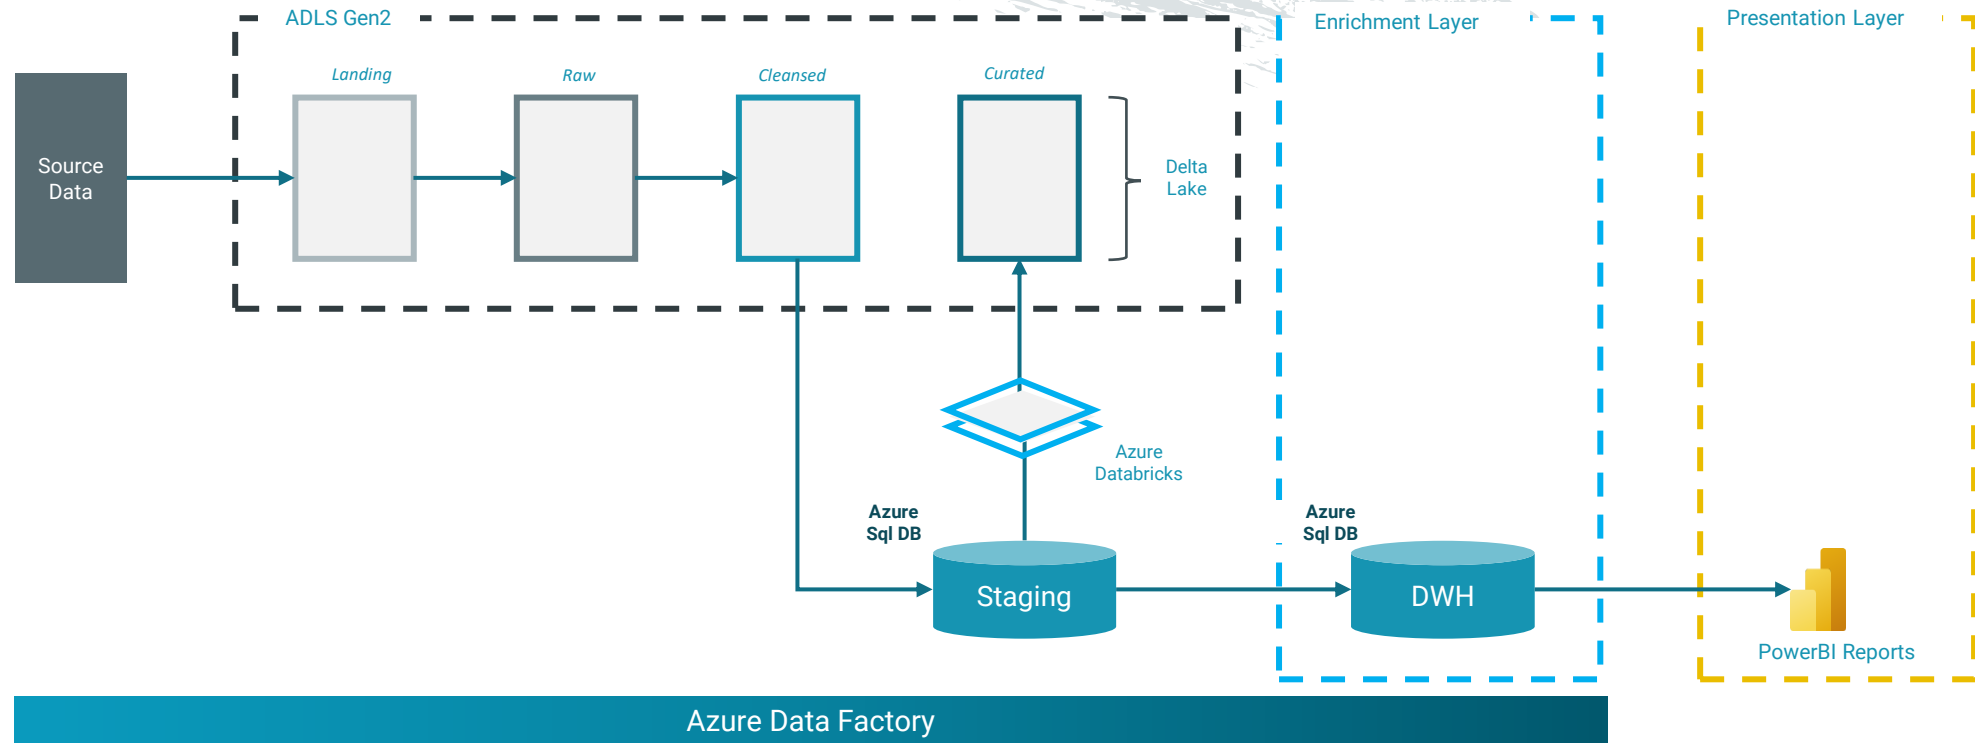

## Typical Modern Data Warehouse Architecture

*Typical Modern Data Warehouse Architecture with medallion layers for data refinement with Azure Components*

# HANDS-ON PROJECT

## Architecture of Hands-on Project

*What we will build in this course*

SECTION 5

# REPOSITORIES

---

# REPOSITORIES

*Code and Sample Data Repositories for this course*

Materials for this course are available in the Git Repository

■ <https://github.com/aravindsuri/ADFTutorial>

Here you will find:

- Sample data required for building the hands-on project
- Relevant PDF documents useful for the course
- Sql Scripts for building the Tables
- Python Notebooks
- ARM Scripts

# MODULE SUMMARY

In this module we learnt

## OVERVIEW

Overview of the Business and the challenges the business faces

The solution requirements of the business

## ARCHITECTURE

We learnt about the typical architectural pattern for an Analytics solution

The architecture for the hands-on project

## REPOSITORIES

We learnt about the available repositories for this course
